
Earthing terminal

Type: AM11

Product ID: 2TKA110001G1

GTIN: 6410019130515

The AM11 earthing terminal is used, for example, for the potential equalization of air-conditioning and ventilation ducts. The earthing terminal has a single $>10 \text{ mm}^2$ Cu terminal. The terminal bar is made of tinned copper. It is affixed with two pull rivets (pop-rivets), $\varnothing 3,2 \text{ mm}$, in the air-conditioning or ventilation duct and the protective lead is connected to the connector attachment point. The conductors having a cross-section of Cu $1,5 - 10 \text{ mm}^2$ are suited to a conductor connector equipped with conductor protection.
